Instructions for fitting

1. Prepare to use respirator
   - Check the respirator for holes, tears or other damage to surfaces, straps, and nose foam to ensure that your respirator works well.
   - Replace with a new respirator if damaged.
   - Place the mask within in hand, the nosepiece pointing at your finger and the headbands hanging downwards.
   - If you wear glasses, read steps 2 through 4 then remove your glasses before putting on the respirator.

2. Place respirator on face
   - Place the respirator against your face, with the bottom under your chin and nosepiece across bridge of your nose.
   - Pull the top elastic band over your head and place high at the top back of your head.
   - Next, pull the bottom elastic band over your neck and place around the neck below your ears.
   - Adjust the headband for a proper and comfortable fit. Pull the headband at either side of buckle for tighter fit, push out the buckle for looser fit.

3. Adjust the headband
   - Use both hands to bend the nosepiece to fit snugly against your nose and face. The respirator may not fit as well if you adjust the nosepiece using one hand. Use two hands.
   - Side fingers down both sides of nosepiece to seal it against your nose and face.

4. Adjust the nosepiece
   - Completely cover the middle panel of the respirator with one or both hands.
   - Do not push the respirator against your face.
   - Do not place the respirator on your face without adjusting the nosepiece and preventing air from the back of the respirator from being drawn in.
   - If you feel air blowing on your face or eyes, the respirator needs to be adjusted. To adjust, stretch the headbands again by pulling them backwards. Then correct the position of the respirator and check the face seal again.
   - When the respirator is a good fit, you will not feel any air blowing on your face or eyes. Return eyewear to face, if applicable.

Proper fit of the respirator is critical to reducing wearer exposure to airborne gases. It is important to read User Instructions carefully.

Lot: MFG:

PASTURE A520CS RESPIRATOR

Pasture A520CS is a NIOSH certified N95 respirator, and is indicated to be used by the healthcare personnel during procedures to protect both the patient and the healthcare personnel from the transfer of microorganisms, body fluids, and particulate material.

- Single use only. Do not reuse.
- Non-sterile

Storage

The respirator should be placed in a container and stored in a clean, cool and dry atmosphere to ensure that it is protected against dust, chemicals, moisture, excessive heat and direct sunlight.

$\Delta C=50^\circ C$

$\leq 80$

This respirator is approved only in the following configuration:

Warning

This section contains critical information for the safe and effective use of the respirator:

1. Do not use this mask as protection against toxic particles, gases or vapors, solvents or spray-painting operations, or in explosive atmospheres.
2. Do not use this mask in tanks, enclosures or any circumstances where gas or smoke may be present or in oxygen deficient atmospheres.
3. This mask should not be worn when conditions prevent a good face to face piece seal. Such conditions include the growth of beard or mustache and salivary and the use of spectacles or any other devices containing latexes or substances which pass between the mask sealing edge and the wearer's face.
4. Leave the work area immediately if breathing becomes difficult or distressing or any other sign of distress occurs.
5. It is not allowed to use the mask without proper fit.

Instructions for use

This section contains critical information for the safe and effective use of the respirator:

1. This mask must not be used for more than single shift (8 hours). Always discard and replace the mask when the breathing resistance becomes excessive or at the end of every working shift.
2. Do not alter or modify the mask. Use only the respirator in the configuration specified by the manufacturer.
3. All respirators are to be used in the recommended use of the respirator. If you have any questions or concerns about the use of this respirator, please contact your healthcare provider.
4. Before use of these respirators, a written respiratory protection program must be implemented, meeting all the requirements of OSHA 29 CFR 1910.134, including training, medical evaluation and fit testing.
